THE NIGHT WINDOW

Craft department – Short-film development pitch

Hook: Let the paper trail and a set of screws carry the reversals.

Logline: Before midnight, a repair-kiosk owner must choose between her lease deposit and correcting a battery record that could save a courier cooperative from paying for her mistake.

Design needs a safe openable scanner, visible R17 stamp, two-part forms and a renewal envelope. Sound can follow the chain, pencil and cash without dramatizing every beat. Camera tests must solve reflected phone flash and readable screens. Editorial rhythm should preserve the interrupted screw routine in S07.

Proposed next step: Build and rehearse duplicate props; test inserts and continuity before committing to a night shoot.

Status and scope: Original short, revised host-agent demonstration draft. No cast, finance, partners or distribution attached. Single-agent self-review; no independent endorsement. Local draft only, unsent. This small demo does not establish feature-quality guarantees.
